m-Fin SPEEDTYPE LIST [1]

December 21, 2011 by Carl Sorenson [2]

Need a reference list of your active speedtypes? Use m-Fin SPEEDTYPE LIST. Think of this as a master list of speedtypes showing the FOPPS for each speedtype and important attributes.

This report is available for you to test in Cognos QA in the **Finance/Look Ups/** folder. **[25-Jan-2012: This report is in production now.]** The EXTRA prompt on the second page of prompting lets you select just the attribute columns you need.

SECONDARY SPDTYPE CODE

One column in this report, SECONDARY SPDTYPE CODE, does not appear in any other report. SECONDARY SPDTYPE CODE tells if there are other speedtypes for the same FOPPS. This is rare. Where they do exist they are inactive. m-Fin reports use only the primary speedtype, the one in the first column.
