Paging in m-Fin SPEEDTYPE LIST [1]

March 6, 2017 by Carl Sorenson [2]

We are fixing m-Fin SPEEDTYPE LIST's page-by feature. When the *page by* prompt is used the report will start a new page for each different value. For example, if you are running for an orgnode and set *page by* to *org,* each org under the orgnode starts on a new page. This report is in the *look ups* subfolder. It just produces master lists of speedtypes. It does not report dollars.
