Pay transactions report enhancements [1]

June 8, 2017 by Carl Sorenson [2]

We are improving m-Fin PAYROLL TRANSACTIONS. This new version of the report is available to you now for testing in the QA environment: **[now in production]**

1. If there are payroll expense transfers (PET), the report will show three PET identifier columns and provide a drill link to m-Fin PET.
2. Identical pay lines are collapsed into one line, summing the dollars.

My thanks to Boulder's Stefanie Furman for these improvement ideas, and for testing.
