Project expenditures by month prompts [1]

June 5, 2017 by Carl Sorenson [2]

The prompts on the HTML output for m-Fin PROJECT EXPENDITURES BY MONTH are getting fixed. They have been refreshing the page without actually changing the data filtering. Unless problems are found in testing we'll have the fix into production later this week. The work-around has been to return to the main prompt page. I invite you to test in the CU-Data QA environment. **[in production now]**
