RE Summary Dataset Output [1]

September 15, 2015 by Carl Sorenson [2]

With the new m-Fin REVENUE AND EXPENDITURE SUMMARY that went into production about a month ago we inadvertantly lost the speedtype and fopps columns in the dataset output. Dataset output is *Excel 2007 data* and *csv*. Now we have another version of the report ready with these columns restored. This does not affect the HTML, PDF, or formatted MSExcel outputs. For these other output types the report is exactly the same.

Testing

This version of the report is avaialable to you now for testing in Cognos QA [3]. Unless we hear of any problems we can migrate it to production later this month.
