

RE Summary gets saveset buttons ^[1]

January 9, 2017 by [Carl Sorenson](#) ^[2]

We are adding saveset buttons to m-Fin REVENUE AND EXPENDITURE SUMMARY. These provide a simple way to memorize a setting for the EXTRAS prompt ^[3]. The memory is in your web browser's local storage, so it lasts until the next time you clear history (aka. "cookies and cache").

This new version of m-Fin REVENUE AND EXPENDITURE SUMMARY is available for testing now in [Cognos QA](#) ^[4] and will migrate to production soon unless problems are found.
