Refurbished m-Fin BAE BY MONTH - SUMMARY [1]

March 16, 2015 by Carl Sorenson [2]

We've improved m-Fin BAE BY MONTH - SUMMARY, refining the prompting and improving its internal workings. An obvious change is now it has single speedtype mode [3].

As with the other reports that we have been refurbishing lately, we believe this version will fix the XQE-CM-0004 problem, an intermittent abend [4] that was happening on drills.

Are you a user of this report? Come on into Cognos QA and give this new version a test drive. **[16-APR-2015 migrated to production.]**
