Refurbished m-Fin BUDGET TO ACTUAL [1]

February 25, 2015 by Carl Sorenson [2]

We've improved the m-Fin BUDGET TO ACTUAL report, refining the prompting and improving its internal workings. As with the other reports that we have been doing this to recently, we believe this will fix the XQE-CM-0004 problem, an intermittent abend [3]that was happening on drills.

Big fan of this report in production? Please give this new version a try in Cognos QA, to confirm that it works properly for you. **[02-mar-2015 migrated to production]**
