Refurbished m-Fin EXPENDITURE TYPE [1]

January 30, 2015 by Carl Sorenson [2]

We've refurbished m-Fin EXPENDITURE TYPE, updating the prompting and adding descriptions to some of the codes in the output. This report gives an account tree level05 summary for each program/project and is good for moderate sized org | orgnodes. It also can run for a program, a project, or a subclass. It does not run by speedtype. It is ready for testing in Cognos QA. **[12-feb-2015 migrated to production]**
