SPEEDTYPE ONE-LINER gets two small improvements [1]

October 5, 2016 by Carl Sorenson [2]

We've made two small improvements to m-Fin SPEEDTYPE ONE-LINER, for cash and sorting. There is now an additional EXTRAS option for a FY BEGIN CASH column. We got this suggestion from an auxiliary fund oriented user on the Anschutz campus. Also, we've added an additional LINE SORT option that sorts the speedtypes by the budget balance. This version of the report is available to you now in Cognos QA [3]. Unless I hear of problems I expect it will migrate to production this weekend.
