Welcome to Cognos 12.1.1 [1]

May 27, 2026 by Sarju Khadka [2]

CU-Data is now running on Cognos 12.1.1, and the upgrade is live as of this morning. A big thank you to Lisa Damboise and her UIS/IRM team for their efforts in ensuring a smooth upgrade.

This upgrade improves the overall performance and the look of CU-Data, making it easier to navigate and use day-to-day.

What's Staying the Same

- Your reports, report views, and schedules are all intact
- CU-Data access works the same way — same login, same data
- The reports themselves haven't changed

Your Action Items A few things to do today to make sure everything runs smoothly:

- **Don't see the new interface?** Clear your cache, close your browser, and relaunch CU-Data.
- **Check your 'My Content' folder** to confirm your report views and schedules are there. If anything is missing, contact us right away.
- **Have scheduled reports?** Renew your credentials to prevent any interruption: go to the **Personal menu (top right) > Profile and Settings > Profile > Advanced Options**, then click **Renew** next to Credentials.

Questions or issues? Reach out to us — we're here to help make this transition seamless.
