Cal Anderson & Jaime Mendez Share OUC Efficiencies at PeopleSoft Conference [1]

April 4, 2013 by normandy.roden [2]

Congratulations to Cal Anderson (OUC's Director of Financial & Reporting Systems) and Jaime Mendez (Financial Systems Analyst) on their well-received presentation at Alliance 2013 in Indianapolis last month. The talk was titled, "Business Process Improvement and Leveraging PeopleSoft Investment." It offered tips and templates for achieving both goals through the examples of PeopleSoft's Accounts Receivable/Billing modules as well as Fiscal Certification and other innovative processes that utilize the Finance System at the University of Colorado. The Alliance Conference is the largest meeting of higher education, public sector, and federal users of Oracle applications in the world. The annual event draws approximately 3,500-4,000 participants.
