ChartFields & Attributes Webpage Redesigned [1]

February 13, 2018 by normandy.roden [2]

We've redesigned a frequently visited page on the Office of University Controller website: www.cu.edu/controller [3] - click on Accounting & Finance, ChartFields & Attributes.

New structure improves user experience

Previously, the **ChartFields & Attributes webpage** [4] was a simple list of links, in alphabetical order by name. Now, this page:

- Segments information in logical chunks (Finance System Structure, Account, Fund, Organization, Program/Project);
- Provides context through brief text descriptions;
- Makes it easy to navigate between resources, thanks to a new Related Links box; and,
- Enhances understanding through contextual information on each linked resource page.

Some things to note

For the **Org Tree Hierarchy,** we now direct you to the m-Fin Org Tree List so you can see how to run a current hierarchy report, instead of viewing a report produced once a year.

We removed the **old Journal Source Code Listing,** since -- in FIN 9.2 -- we can identify the creator/approver of the journal directly and so source code is no longer useful for contact information.

We also removed the **Gift Attributes on SpeedType** link since the information it provided is redundant with other resources on this page.
