

## **FIN 9.2 Update: Weekly Recap - May 20** <sup>[1]</sup>

May 20, 2016 by [\(not verified\)](#) <sup>[2]</sup>

### **PETs and fringe remain top priorities overall**

We have dedicated teams working to resolve PET and fringe benefit allocation issues. These are top priorities for both HCM and FIN.

### **Grants work is the highest priority for FIN-specific fixes**

Our grants consultants divide their time between the individual campuses and the System Office. The campuses and the OUC have worked together to identify a separate Grants Support Issue Tracking list, available online at <http://www.cu.edu/controller/elevate> <sup>[3]</sup>. We'll talk about some of the items on that list later this month.

### **Next in line (after Grants) are the FIN Top FYE priorities**

Cash lines on journals have been fixed ... and therefore dropped off the Top FYE Priority list. We have eight items on this week's Top FYE priorities list:

- **Student loan transactions, data going out.** Making progress. Note: The companion item (student loan transactions, mapping data coming in) has been reevaluated as a non-FYE issue.
- **Queries to support the external audit.** Of the 55 queries needed, 54 are fixed.
- **Reconciliation for payroll/BRS warrants.** We've been unable to reconcile payroll warrants since go-live. In progress.
- **ID Account codes should balance on journals.** In progress.
- **Cash roll-up.** Cash roll-up SpeedTypes still need to be added to the new Fund 12 cost share. In progress.
- **Cash transfers.** We need a cash transfer journal customization to help automate cash transfer validation (using the cash transfer matrix rather than relying on manual identification/approval by campuses). In progress.
- **Budget Account codes shouldn't be available in actual journals.** Budget Account codes should only be used with the budget ledgers. In progress.
- **Workflow.** Making progress.

You'll find a complete list of FIN issues on the OUC website: [www.cu.edu/controller/elevate](http://www.cu.edu/controller/elevate) <sup>[3]</sup>
