Got Enhancements? These Cognos m-Fin Reports Do … [1]

August 19, 2013 by normandy.roden [2]

We're happy to announce some recent and excellent developments in 17 of the Cognos management-financial (m-Fin) reports. You'll find improved (immediate!) input validation for the m-Fin Financial Detail, SpeedType Summary, Operating Summary, Outstanding Encumbrances, and Revenue & Expenditure reports, among others. You'll also see improved subtotaling functionality (more subtotals, better labels) in the Operating Summary and in the Trial Balance and Revenue & Expenditure reports. Plus: The m-Fin Budget to Actual report runs faster … and the m-Fin Payroll Accounting Period report includes an additional page of differently-sorted data. Most of our Cognos users run several of these reports on a regular basis – so we hope you're intrigued and will check out the details on Carl's m-Fin blog: www.cu.edu/controller/initiatives/reporting/?p=2941 [3].
