Like History? This Report helps you Review It [1]

November 15, 2013 by normandy.roden [2]

If you aren't reading Carl's m-Fin blog, you're missing some very interesting developments in the Cognos Reporting System. Here's a recent example: The new **m-Fin ACCOUNT ACTUALS PERIOD BY FISCAL YEAR** report summarizes Account ChartField values (as the report title indicates) across the accounting periods of multiple fiscal years. History in your hands! You can review historical cash balances on a clinical trial … take a look at salary over the years … or monitor operating expenditures. But there's more. The report can also provide visual cues. We particularly like the CHART: IN/OUT BAR view that highlights positive and negative transactions. For more information, read the post … and let Carl know what you think: https://www.cu.edu/controller/initiatives/reporting/?p=3137 [3].
