Ryan Day Explains Innovative Systems Use at Alliance Conference [1]

March 9, 2016 by normandy.roden [2]

At this year's premier gathering of higher education PeopleSoft users, Ryan Day highlighted CU ingenuity in facilitating department processing while avoiding software customization.

The OUC's Financial Systems Analyst delivered a session entitled "SpeedTypes R Us" at this year's Higher Education User Group (HEUG) national event, the 2016 Alliance Conference.

Presenting in the newly formed Innovations track, Ryan outlined the process by which CU utilized a delivered data element to expand SpeedType use -- thereby simplifying departmental data entry and review.

Good job, Ryan!
