Introducing AI Assisted Approvals for CU Marketplace [1]

May 14, 2025 by Staff [2]

The PSC is excited to announce a new “Early Adopter” feature in CU Marketplace: AI Assisted Approvals. This innovative tool uses AI to assess individual line items in requisition and invoice workflows, providing a confidence level based on historical approval patterns. Importantly, this feature will not impact processing times, and your documents will continue to move through approval workflows as usual regardless of the confidence levels. As this feature is still in beta, the PSC will first use this tool for internal workflow steps only (e.g. Purchasing Review) as we gather more data and information on how this tool can best be utilized at CU.

For questions, please reach out to the PSC Service Desk at PSC@cu.edu [3].
