Add emojis to your keyboard [1]

June 25, 2020 by UIS Communications [2]

You can quickly express yourself by adding an emoji with this nifty keyboard shortcut. Do this by pressing the **Windows logo key + period (.)** to open an emoji panel on a PC. For a Mac press **Command + Control + Space** to open an emoji panel.

In addition to traditional emojis, you can use kaomojis to create faces with text, as well as symbols—like rare punctuation and currency—to make a statement.

Not seeing the emoji keyboard? Contact the Service Desk [3] for help.
