

Celebrate Halloween with a spooky Zoom background ^[1]

October 19, 2021 by [UIS Communications](#) ^[2]

Working from home and don't have a proper Zoom background? Use a virtual background to display an image or video during your meetings. A physical green screen is not required for this feature though it will improve results.

Zoom users can upload their own images or videos to use as a virtual background.

To set up a virtual background follow these steps:

1. Find **Settings** on your Zoom account (click on your profile image in the top right corner and select "Settings" from the menu).
2. Click **Background and Filters** in the menu on the left.
3. Choose a blurred background, one of the default backgrounds or upload your own image.
