

Do you have more tabs open than you can handle? [1]

July 16, 2020 by [UIS Communications](#) [2]

While you can use your mouse to click through your open tabs, an easier keyboard shortcut will allow you to view tabs quicker and more efficiently.

The keyboard shortcuts vary between browsers:

Google Chrome: You can switch between tabs in Google Chrome by pressing **CTRL+TAB**. That will simply rotate you through all the tabs going forward and then starting from the beginning again when you reach the last tab on the right. If you want to go the other way, right to left, then press **CTRL+SHIFT+TAB**.

Want to pull up a specific tab? You can press **CTRL+N**, where N is a number between 1 and 8. Unfortunately, you can't go past 8, so if you have more than eight tabs, you'll have to use a different keyboard shortcut or just click on it. **CTRL+9** will take you to the last tab, even if there are more than 8!

Accidentally closed a tab? On Google Chrome **CTRL+SHIFT+T** can bring back the last tab you closed.

Internet Explorer: Similar to Google Chrome, you can switch between tabs from beginning to end, right to left, and view specific tabs using the same keyboard shortcuts.

Safari: Also like Google Chrome and Internet Explorer, **CTRL+TAB** and **CTRL+SHIFT+TAB** work the same on Safari. On Mac, you are still able to view each tab individually by clicking **COMMAND+N** by replacing N with the number tab you want to view. If you find yourself confused finding which tab is which, click on **COMMAND+SHIFT+I** to view all open tabs. Lastly, revive your last closed tab with **COMMAND+Z**.

Extra Tip: You can also use **ALT+TAB** shortcut key on a PC for switching between open applications to more easily navigate. For Mac users, use **COMMAND+TAB** to switch between open applications.
