

Enhanced security features ^[1]

April 9, 2020 by [UIS Communications](#) ^[2]

Zoom has made it easier than ever to confirm security settings and keep your meetings safe. With their most recent update, they have added a Security Icon in the meeting host's control panel.

This icon combines all of Zoom's existing in-meeting security controls in one place including: locking the meeting, allowing participants to share their screen and enable the waiting room. If you aren't yet seeing this icon, you can download the latest updates from the [Zoom Download Center](#) ^[3].
