

Schedule meetings based on your colleague's availability

[1]

November 1, 2021 by [UIS Communications](#) [2]

You can avoid double-booking meetings with Outlook Scheduling Assistant, which allows you to view your colleagues' availability. Knowing the time availability is not the only benefit of Outlook — Room Finder is another benefit that aids users in finding location availability to meet.

1. From the **Inbox**, select **New Items > Meeting** or in the **Calendar**, select **New Meeting**. You also can use the keyboard shortcut **Ctrl+Shift+Q** to create a new meeting request.
2. Add attendees in the **To** box.
3. Select **Scheduling Assistant** from the ribbon. You'll see a row for every recipient you entered in the To box. If you want to add more attendees, you can type their name in any blank row in the Scheduling Assistant.
4. Times that your attendees are busy are shown in dark blue. Times that your attendees have a tentative appointment are shown in a light blue hashed block, and times outside of your attendees' working hours are shown in light gray. Select an available time for all your attendees.

Room Finder is located on the right side of the **Meeting** screen.

1. Click on **Room Finder** and select the floor you'd like to host your meeting on.
2. Select a location from the list of **Suggested conference rooms**.
3. The room will be added in the field **Required** in the meeting screen
4. Title your meeting, add attendees and send.
