

Symantec upgrade April 15 ^[1]

April 8, 2021 by [UIS Communications](#) ^[2]

On April 15 between 3-4 p.m., the Service Desk will be pushing a Symantec update, our security software, to all System Administration Windows users to avoid security vulnerabilities. Mac users will have an update at a later time. If a device is running an older version of Symantec Endpoint Protection, an attacker can get a hold of private data from your computer.

Once the Symantec upgrade is complete, users will be prompted to restart their computer within one hour, or a forced restart will take place.

Please contact the [Service Desk](#) ^[3] if you have any questions.
