Translate a webpage in Chrome, Edge, Firefox and Safari [1]

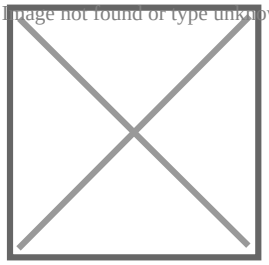

October 27, 2026 by ES and UIS Communications [2]

Translation capabilities are integrated into most web browsers. Discover how to translate cu.edu webpages in your chosen language.

Google Chrome

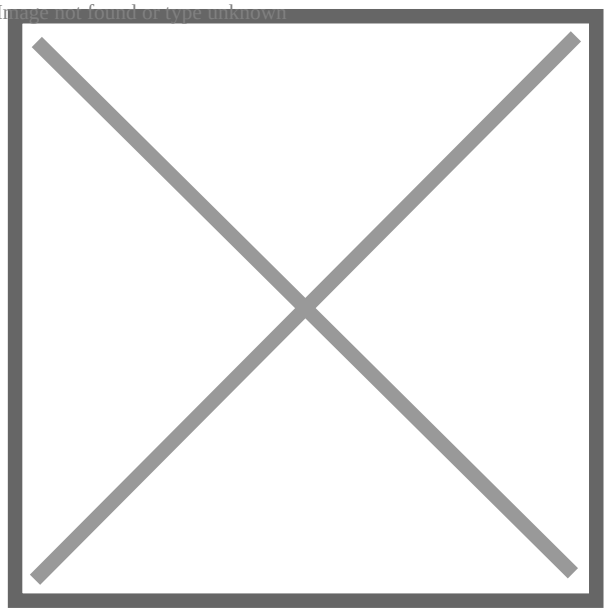

1. Open the webpage. If Chrome detects a different language, a **Translate** prompt appears near the address bar. Select **Translate**.

Image not found or type unknown

2. If you don't see the prompt, select the **Translate icon** at the end of the address bar, or open the **three-dot menu** in the upper-right corner and select **Translate**.

Image not found or type unknown

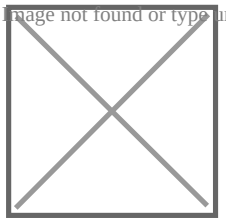

3. To pick a different language, open the translation pop-up, select its three-dot menu and select **Choose another language**.

Microsoft Edge

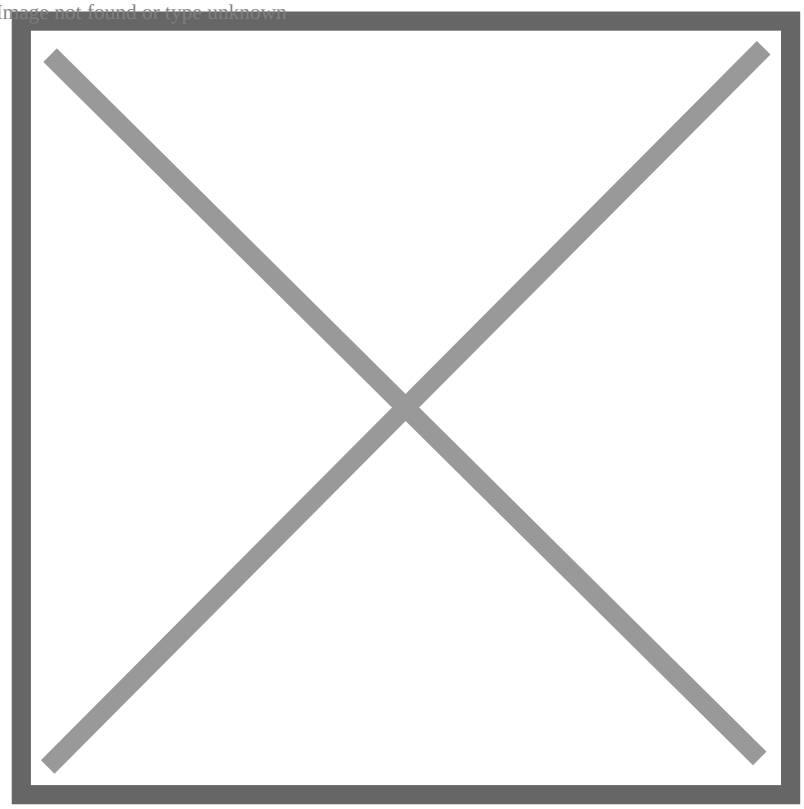

1. Open the webpage. If Edge detects a different language, a translation bar appears. Select **Translate**.

Image not found or type unknown

2. If you don't see the bar, right-click an empty area of the page (not a link) and select **Translate to English,** or select the **language icon** at the end of the address bar.

Image not found or type unknown

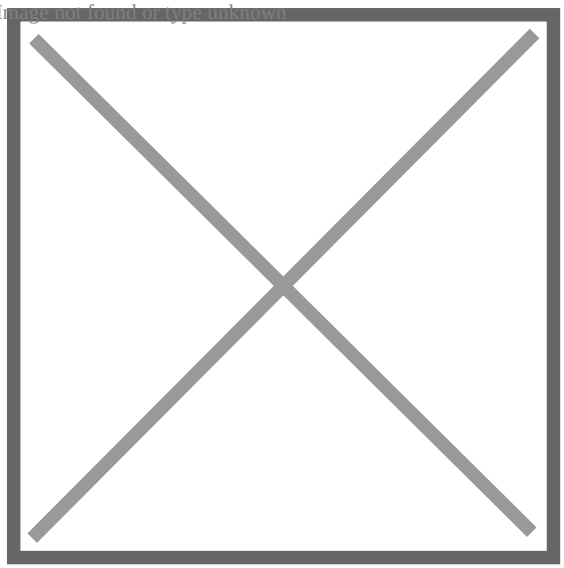

3. Choose another language if needed from the dropdown, then select **Translate**.

Mozilla Firefox

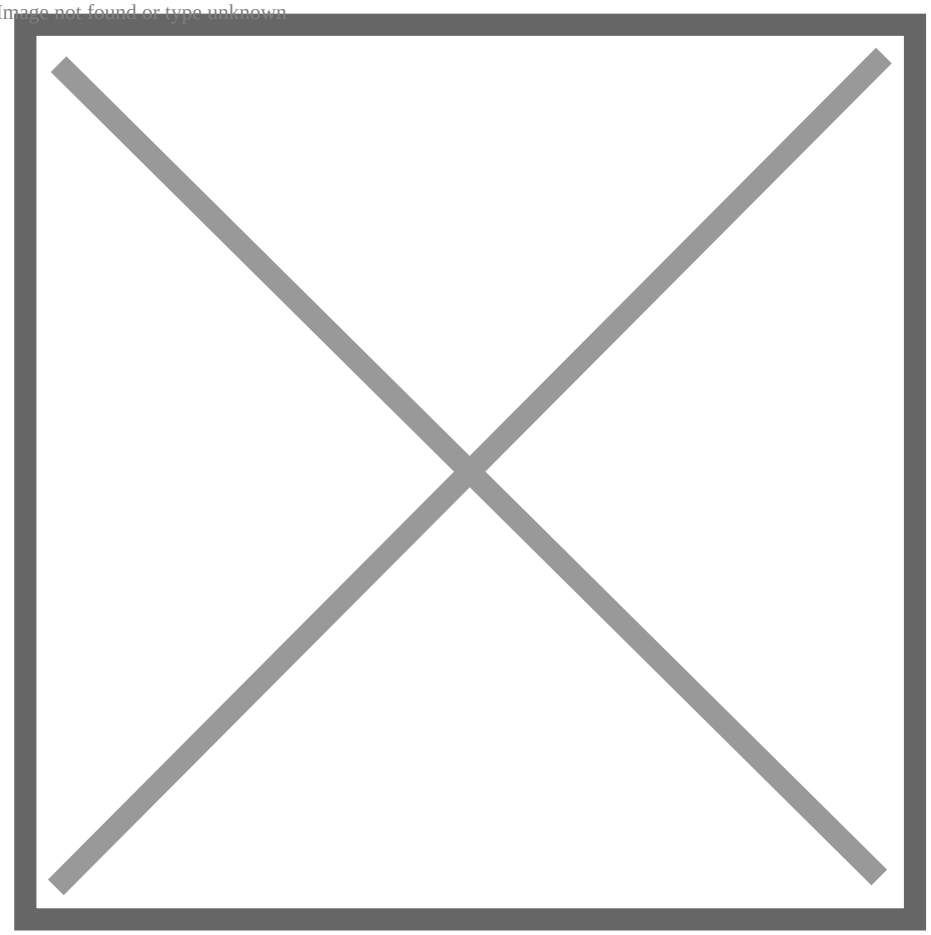

1. Open the webpage. If Firefox can translate it, a **Translate icon** appears in the address bar.

Image not found or type unknown

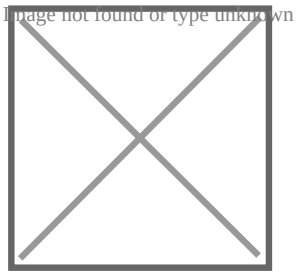

2. Select the icon, choose the language to translate to, then select **Translate**. You can also open the menu in the upper-right corner and select **Translate page**.

Image not found or type unknown

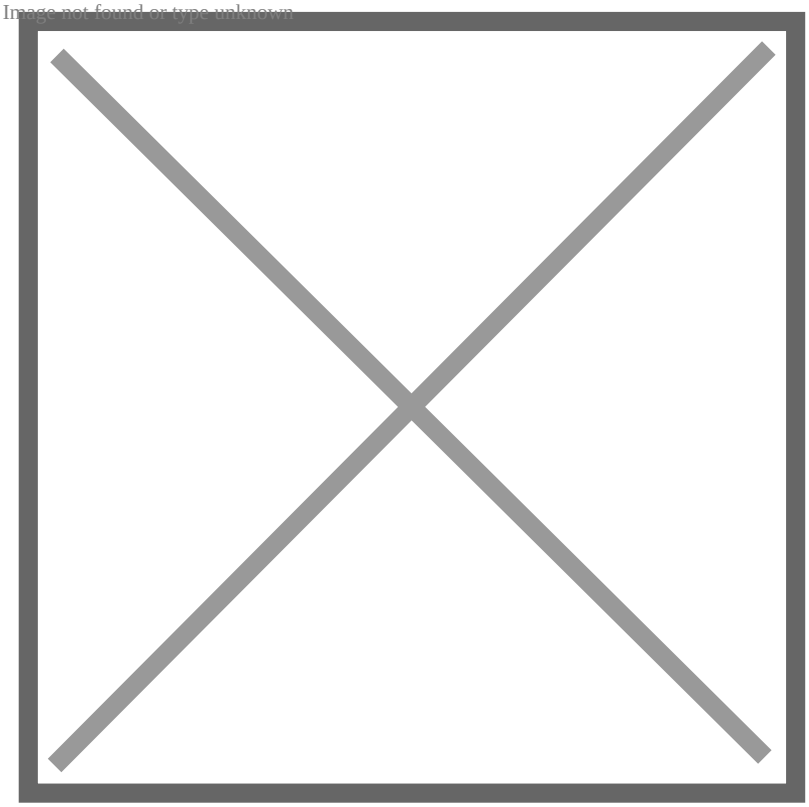

Apple Safari (Mac)

1. Open the webpage. If Safari can translate it, a **Translate icon** appears in the address bar. Select it and choose your language.

2. You can also select **View** in the menu bar, hover over Translation, and choose **Translate** to followed by your language.

3. If prompted, select **Enable Translation.**

Want to see the original again?

Select the same translate icon (or the pop-up that appears) and choose to show the original page.
