

Using DUO for VPN security ^[1]

July 22, 2021 by [UIS Communications](#) ^[2]

Beginning Sept. 15, CU System Administration users will need to authenticate their identity to log in to the VPN. This added step will decrease the likelihood that outside parties can access to your data, even if they obtain or guess your password.

To prepare, download the Duo Mobile app to make two-factor authentication faster and easier with three ways to authenticate, based on your preference.

For detailed instructions on how to download and use the DUO Mobile app, [visit our website](#) ^[3].

The UIS Service Desk will host sessions in August to walk you through downloading and using the app.
