

VPN secures your connection ^[1]

April 23, 2020 by [UIS Communications](#) ^[2]

Always double check that you are connected to CU System's Virtual Private Network (VPN). This provides a secure connection to our network from any location and is required to access many CU-specific drives and applications. This also allows regular (and often critical) updates to be pushed out to your machine. The UIS Service Desk has created [how-to-guides](#) ^[3] to help you connect to the VPN.

If you'd like to learn more about the importance of connecting to the VPN (or any of this week's tips), we encourage you to attend our weekly live Q&A session!
