

Watch VPN multifactor authentication webinar ^[1]

August 24, 2021 by [UIS Communications](#) ^[2]

Beginning Sept. 15, CU System Administration users will need to authenticate their identity to log in to the VPN. This added step will decrease the likelihood that outside parties can gain access to your data, even if they have or guess your password.

The UIS Service Desk recommends that users download the Duo Mobile app to make the two-factor authentication process faster and simpler. The service desk hosted two webinar sessions this month to walk users through this change.
