Zoom waiting room and passcode no longer needed [1]

September 24, 2020 by UIS Communications [2]

Previously, we shared that Zoom planned to require security features, including a mandatory waiting room or passcode, for all users. On Sept. 20, Zoom changed their decision to require these features based on customer feedback. Zoom will not be enforcing a mandatory security requirement on enabling a waiting room or passcode for any accounts on Sept. 27, or any point thereafter.

Already have it set up? You can either remove them or keep it enabled for an added layer of security.
