

Learn about UIS and the services we provide ^[1]

August 26, 2016 by [UIS Communications](#) ^[2]

University Information Systems (UIS) is the IT department residing within the System Administration office that manages and supports universitywide core applications that are used by students, faculty and staff at all campuses and within the Office of the President. While campuses offer services, applications and tools that serve the unique needs of each campus, UIS's role is to provide the centralized applications of record for functions that exist uniformly across all campuses.

UIS invites you to learn more about the services we offer on our new [About Us](#) ^[3] page and by reading about our services in our [Service Catalog](#) ^[4]! We also invite you to meet our [leadership team](#) ^[5] to learn more about the UIS teams and what they do. We hope these new pages are helpful in getting to know us!
