By the Numbers: UIS fall semester start sees growing student populations [1]

October 10, 2017 by Employee and Information Services [2]

The Fall 2017 semester start has been notably successful for the University of Colorado. Enrollment increased on all campuses, with CU Denver and CU Colorado Springs seeing record-breaking numbers.

UIS spent more than 1,250 hours planning and preparing for fall startup. With student populations on the rise, supporting the systems to register and enroll students in classes takes a lot of behind-the-scenes collaboration and hard work from UIS teams and their campus partners. After all, CU's systems needed to support the 562,875 student portal visits during startup week!

Groups who made the process a success include:

- The Student System (Functional and Technical) teams
- Portal and Mobile team
- ECS and IAM teams

Get a glimpse of the results of their work with the startup week infographic below.

STUDENT

- CU DENVER
- UCCS
- CU BOULDER
