Spring Startup 2018 by the Numbers: UIS helps implement another successful semester start [1]

May 10, 2018 by UIS Communications [2]

For spring 2018, the University of Colorado experienced an all-campus start, meaning the semester start on the same day on all campuses. This occasional occurrence makes the successful semester start – with over 465,000 student portal visits in a four-day period – even more impressive.

UIS spent over 700 hours planning, preparing and implementing spring startup. With student populations on the rise, supporting the systems to register and enroll students in classes takes a lot of collaboration and hard work from UIS teams and their campus partners.

Groups who made the process a success include:

- The Student System (Functional and Technical) teams
- Portal and Mobile team
- ECS and IAM teams

See the results of their startup week work in the below infographic:

SPRING SEMESTER START 2018

The hard work and support UIS provided before (and during) startup week ensured a smooth and successful beginning to the semester.

The proof is in the numbers:
