

UIS Welcomes New Student Systems Director [1]

November 2, 2016 by [UIS Communications](#) [2]

UIS welcomes Rana Silver as Director of Student Systems. Silver was promoted to the role after serving in the capacity of Application Manager for Student Records in UIS since April 2011, where she was responsible for bringing several enhancements to the system. Most notably, she led the [FERPA Consent to Release](#) [3] project, which allows students to request access to student academic records.

[4]

Silver brings nineteen years of progressive experience in student systems and higher education management ranging across all facets of PeopleSoft Campus Solutions and integrated systems to CU. She holds a Bachelor's Degree in Spanish for International Service from the Catholic University of America. She enjoys spending time at her home in the mountains hiking with her family, trail running and exploring hot springs in her free time.

Silver and the Student Systems team work diligently to ensure that students, faculty and staff enjoy the most pleasant and effective user experiences. Working with campus departments and leadership, the team liaises, analyzes, designs and manages the implementation of solutions.
