Assign Skillsoft courses, books and videos to students [1]

October 3, 2018 by Employee Services [2]

Skillsoft allows you to introduce and assign resources.

Available to all University of Colorado students, this online learning platform provides a place to gain essential skills students can use during and after their time at CU. The best part: Skillsoft courses and books are available on-demand, so students can learn at their own pace and when it's convenient for them.

Deep links make it even easier:

You can link directly to Skillsoft resources, allowing students to bypass navigation steps. They click on a link, log in with their student system credentials and launch the course.

Learn how with this step-by-step guide [3].

With Skillsoft, students can:

- Gain valuable skills, including business and software skills, IT, presentation skills, Microsoft Office and more.
- Achieve their educational, personal and professional goals.
- When finished, students may print a Certificate of Completion.

Want more ways to share Skillsoft?

Provide these fliers [4]to your students with information and instructions to access Skillsoft for each campus.
