A redesigned CU Resources area of the employee portal went live in July. This only affected the CU Resources area, not faculty or student portals.

This update gave employees several upgrades, including:

- A responsive design that lets the portal render on tables and mobile devices
- New search features that will allow you to find items throughout the portal
- Drag and drop tiles to personalize your homepage
- A drop down menu accessible throughout the portal

What does this mean for you?

- Approvals and timecards on the go
- Easily search for items in the search bar
- Customizable homepage for the items you use the most
- Fewer clicks to get to what you want with more homepage tiles
- A more personalized, efficient experience
