PERA debuts mobile app for on-the-go account management [1]

September 1, 2023 by ES and UIS Communications [2]

The free Colorado PERA app, available on iOS [3]and Android [4], offers members quick and easy access to their PERA retirement account, with on-demand access to your account balance, monthly benefit projections and service credit history. The app also enables members to update key account information such as their tax withholding and beneficiary details.

Through the app, users can electronically submit PERA forms including retirement and service credit applications. This includes the option to use your phone's camera to upload images of important documents.

The PERA app contains sensitive financial and personal information and thus makes use of biometric login functions like Face ID and fingerprint authentication on both iOS and Android devices. Visit the PERA app information page [5]to learn more and find links to download the right application for your smart device.
