Payroll Administrators

If you are a university payroll liaison, supervisor, department head or appointing authority, use this page to quickly access required resources to ensure university employees get paid accurately and on time.

Employee Services' payroll administration staff will provide leadership, consultation, expertise and support to university employees, and those involved in the administration of payroll processes. We are also committed to helping you as a technical adviser to the PeopleSoft Human Resource Management System (HRMS) as you create, enter and approve position, job, and payroll data timely and accurately.
