

m-Fin Reports: Recent Updates ^[1]

May 2, 2025

For all you m-Fin report users who may not be signed up to the OUC's [m-Fin Blog](#) ^[2] ... we want to be sure you're up to date on some recent posts.

- **FAMLI Claim Payouts Now Included in Payroll Reports** - FAMLI Claim Payouts (Account 160701) is now summed with other payroll-related data in the m-Fin Payroll Transaction and m-Fin Compensation Summary reports. We know many financial report users have been looking forward to this enhancement!
- **m-Fin Account Number Report Enhancements** - There have been some recent changes to the m-Fin Account Number report. You'll see a few new preset buttons on the second prompt page of the report (they can be used alongside the standard buttons provided) -- as well as a new radio button prompt to exclude rows with no activity for the fiscal year. We've had great feedback on these revisions!
- **The Importance of Clearing Cache** - Browser caching (saving data to your device, locally, from the websites you visit) generally speeds up the loading process when visiting those sites again. However, your web browser's cache can also cause slow loading times and formatting problems if those websites have been updated since your last visit. Are you experiencing errors when attempting to launch CU-Data ... Do some m-Fin prompt value boxes appear to be missing ... Does the Finish/Next button remain inactive/grey? You may need to clear your browser cache!

Questions? Reach out to the OUC's Financial Services & Solutions Help Team at FSS@cu.edu ^[3].
