Overview

Procedural Statement - *effective date: 12/18/12*

General Requirements

We choose to go to the moon in this decade and do the other things, not because they are easy, but because they are hard, because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one which we intend to win.

I believe every human has a finite number of heartbeats. I don't intend to waste any of mine

There can be no thought of finishing for ‘aiming for the stars.’ Both figuratively and literally, it is a task to occupy the generations. And no matter how much progress one makes, there is always the thrill of just beginning.

Houston, Tranquillity Base here. The Eagle has landed.

The sky is the limit only for those who aren't afraid to fly!

Deposits

I believe every human has a finite number of heartbeats. I don't intend to waste any of mine

Astronomy compels the soul to look upward, and leads us from this world to another.

We are all connected; To each other, biologically. To the earth, chemically. To the rest of the universe atomically.

Dinosaurs are extinct today because they lacked opposable thumbs and the brainpower to

build a space program.

What was most significant about the lunar voyage was not that man set foot on the Moon but that they set eye on the earth.

Custody

The dreams of yesterday are the hopes of today and the reality of tomorrow.

NASA is not about the ‘Adventure of Human Space Exploration’…We won’t be doing it just to get out there in space – we’ll be doing it because the things we learn out there will be making life better for a lot of people who won’t be able to go.

The dreams of yesterday are the hopes of today and the reality of tomorrow.

The dreams of yesterday are the hopes of today and the reality of tomorrow.

The Earth was small, light blue, and so touchingly alone, our home that must be defended like a holy relic. The Earth was absolutely round. I believe I never knew what the word round meant until I saw Earth from space.

Refunds

What was most significant about the lunar voyage was not that man set foot on the Moon but that they set eye on the earth.

Dinosaurs are extinct today because they lacked opposable thumbs and the brainpower to build a space program.

You know, being a test pilot isn't always the healthiest business in the world.

Failure is not an option.

We choose to go to the moon in this decade and do the other things, not because they are easy, but because they are hard, because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one which we intend to win.

Voided Transactions

There can be no thought of finishing for ‘aiming for the stars.’ Both figuratively and literally, it is a task to occupy the generations. And no matter how much progress one makes, there is always the thrill of just beginning.

You know, being a test pilot isn't always the healthiest business in the world.

Never in all their history have men been able truly to conceive of the world as one: a single sphere, a globe, having the qualities of a globe, a round earth in which all the directions eventually meet, in which there is no center because every point, or none, is center — an equal earth which all men occupy as equals. The airman's earth, if free men make it, will be truly round: a globe in practice, not in theory.

When I orbited the Earth in a spaceship, I saw for the first time how beautiful our planet is. Mankind, let us preserve and increase this beauty, and not destroy it!

Exceptions

Unless approved by the University Controller, there are no exceptions to this procedural statement.
