CU Alumni Outcomes [1]

ABOUT THIS VISUALIZATION: This data visualization summarizes CU alumni employment and earnings, providing tools to review average and potential earnings, employment in and out of field of study, geographic comparisons, and earnings by campus, major, highest award, sex, race/ethnicity, and state of employment. This tool includes undergraduate and graduate degrees awarded through fiscal year 2019-20. This data visualization was created by the CU System Institutional Research. Additional details are provided below and within the visualization.

ABOUT ALUMNI OUTCOMES: To better understand the post-graduation activities of CU alumni, the CU System Institutional Research partnered with EMSI Labor Market Analytics to learn about the employment status of alumni. EMSI uses publically available information and labor market analytics from the Bureau of Labor Statistics (BLS) to create an employment profile of alumni, including industry, occupation, employer information, geographic region of most recent employment and estimated current and potential salary information based on region. Note: EMSI has since merged with Burning Glass and changed their name to Lightcast.

Should you have questions or comments on this data, please contact IR@cu.edu [4].
