

## **Access** <sup>[1]</sup>

### **How to log in via the Collibra Data Catalog**

To log in from your browser directly, go to <https://cu-edu.collibra.com> <sup>[2]</sup> in your browser, select your campus and log in using your AD credentials.

### **Troubleshooting access issues**

All users with CU Active Directory credentials should be able to access Collibra Data Catalog to view information. If you encounter issues, take the following actions:

1. Verify credentials are correct: CU Campus, UserID and Password.
2. Check to make sure the CAPS lock button is off.
3. Log in to the Campus Portal, and if you're able to log into other CU systems, notify Collibra System Administrators at [IRMHelp@cu.edu](mailto:IRMHelp@cu.edu) <sup>[3]</sup> to request access verification.

### **How to request new Collibra Services**

Collibra is a centrally managed product serving all units of the University of Colorado. All inquiries for additional features, functions or services must be submitted to the CU Data Governance Council of Executives. CU System Administration and all CU campuses have representation on the Data Governance Council and on the project Steering Committee. More information is available at the [UIS Data Governance & Management Project site](#) <sup>[4]</sup>.
