HSA & FSA

Click on a tile to learn more about each plan

What is an FSA?
FSAs (Flexible Spending Account) allow you to set aside money for certain expenses (medical, child care/elder care costs). You don't pay taxes on this money, meaning you'll save an amount equal to the taxes you would have paid. Accounts are subject to a "use-it-or-lose-it" rule each year.
What is an HSA?

An HSA (Health Savings Account) is a tax-savings account that must be paired with a High-Deductible Health Plan, which can be used to pay for qualified health care expenses now or in the future. An HSA is a savings account that you own. The funds in an HSA carry forward year after year, even if you change employers or retire. It is an account that must be paired with a high-deductible health plan and can be used for qualified medical expenses. Qualifying Health Care Expenses are defined as medical, dental or vision care for yourself and your tax dependents, as defined in Code Section 213(d) under Code Section 105. The money you put into an HSA rolls over from year to year.

Use this chart for a quick overview of the differences between an FSA (Flexible Spending Account) and an HSA (Health Savings Account). An FSA is a tax-saving account set up by you to pay for certain qualifying expenses on a pre-tax basis, meaning before they are made subject to payroll taxes. An HSA is a tax-saving account that must be paired with a High-Deductible Health Plan, which can be used to pay for qualified health care expenses now or in the future. An HSA is a savings account that you own. The funds in an HSA carry forward year after year, even if you change employers or retire.
