You contribute to the savings plan through payroll deductions on a pre-tax basis. These contributions are the amount of money that you elect to be deducted from your paycheck to be deposited into your FSA or HSA account. lower your taxable income, and when you spend the money on qualifying expenses or services received that are allowed by the benefit provider and complies with IRS regulations, you will not be taxed.

The money you put into an HSA rolls over from year to year – the money is yours to keep saved or spend on qualified health care expenses or services received that are allowed by the benefit provider and complies with IRS regulations.
