A primary care physician (medical doctor or doctor of osteopathic medicine), nurse practitioner, clinical nurse specialist or physician assistant, as allowed under state law, who provides, coordinates or helps a patient access a range of health care services [2] is not required, and members can refer themselves to doctors of their choice within Anthem's network [3], including specialists [4]. A non-physician specialist is a provider who has more training in a specific area of medicine or a group of patients to diagnose, manage, prevent, or treat certain types of symptoms and conditions. A non-physician specialist is a provider who has more training in a specific area of health care. [4].

There is no out-of-network coverage except for urgent and/or emergency care.
