LinkedIn Learning [1]

LinkedIn Learning is now available in your campus portal.

LinkedIn Learning is a personalized learning system designed to engage employees and students in learning they’ll use, love and apply. It provides professional and career development with online learning material (assets, tools, videos and courses) with the latest workforce-aligned content.

All CU students can access LinkedIn Learning through their campus student portal. Here are just a few benefits for students using LinkedIn Learning:

- Modernize the classroom with the latest workforce-aligned content
- Drive student success to and through graduation
- Aligns with the Regents guiding principles to “support innovation and entrepreneurship at all levels of the university including research and creative activities”
- Prepare students for a world that is rapidly changing
