Kaiser [1]

Under this Kaiser-administered plan, you can choose any healthcare provider within one single statewide network. It is recommended that you select a primary care physician to direct your care. In most cases, referrals are required. However, you may self-refer to certain specialists.

In place of a deductible, enrollees will be responsible for a copay. This plan has no deductible.

Out-of-network providers or facilities that do not enter into a network agreement, usually resulting in higher out of pocket expenses to you. Care is not covered except for emergency care which must be treated at the emergency department of a hospital due to an illness, injury, symptom, or condition severe enough to risk serious danger to your health (or, with respect to a pregnant woman, the health of her unborn child) if you didn’t get medical attention. See where and when to get care.

Features and considerations

EPO Exclusive Provider Organization (EPO)
A health care system designed to give you access to quality, cost-effective service. With an EPO, such as the case of our CU Health Plan Kaiser, you will have access to providers within the Kaiser Network. Your Primary Care Provider, in most cases, will manage and coordinate any care of a specialist you may need by providing you with a referral within the network. There are no out-of-network benefits with the exception of emergency care.
