AI Recognition Award: AI for Teaching & Learning Nomination Form [1]

The CU System Artificial Intelligence (AI) Recognition Award: AI for Teaching & Learning honors faculty who use AI innovatively in their teaching to achieve demonstrable improvements in student learning aligned with stated course learning goals. In addition, the recipient's work should have impact beyond their individual courses. By recognizing and rewarding creative, effective uses of AI in pedagogy that produce meaningful student outcomes, the University of Colorado System aims to foster a culture of innovation and excellence in AI-enhanced teaching. Recipients will receive a one-time honorarium of $4,000. If a pair or team of faculty receive an award, the amount will be shared among the team members. Annually, an advisory board composed of distinguished faculty from across CU will consider proposals and make award recommendations to the president based on the award criteria.

Please thoroughly review the award information [2] before submitting your nomination.

Nominations for AY 2026-2027 open on November 30, 2026.
