The 2013 Best Graduate Schools includes essential, detailed statistical information on more than 1,200 programs nationwide, with rankings in five of the largest professional graduate school disciplines [business](#) ^[3], [law](#) ^[4], [education](#) ^[5], [engineering](#) ^[6], and [medicine](#) ^[7]). Highlights of the rankings will be published in the Best Graduate Schools 2013 edition guidebook, available April 3, 2012.

Rankings are based on two types of data: expert opinions about program quality, and statistical indicators that measure the quality of a school's faculty, research and students. These data come from surveys of more than 1,200 programs and some 12,400 academics and professionals. The publication aims to provide a tool to students and parents who are comparing college programs at accredited public and private universities in the United States.
