The Office of Digital Education and Engagement (ODEE) at the University of Colorado provides System-wide support for innovation in teaching and learning with technology, online education, massively open online courses, access, and student success. ODEE links research and practice in learning outcomes, high-quality pedagogical and student success approaches, and emerging tools such as adaptive learning platforms, MOOCs, artificial intelligence, and augmented/virtual reality, amplifying campus efforts to link to and lead in local, regional, national, and global communities.
ODEE's Diversity, Equity, and Inclusion statement:

ODEE values and celebrates diversity including racial, ethnic, gender identity, sexuality, national origin, religion, mental and physical difference, socio-economic status, and more. We integrate those values in all that we do. We welcome a cacophony of voices at the table.

Evidence is here:

- COLTT--accessibility and student success themes
- MOOCs access, LGBTQ+
- OER equity gaps, affordability
- Taking Student Success to Scale equity gaps
- And through: coaching faculty and staff to be equity- and global-minded in course development and design.
