The Office of Digital Education and Engagement (ODEE) at the University of Colorado provides System-wide support for innovation in teaching and learning with technology, online education, massively open online courses, access, and student success. ODEE links research and practice in learning outcomes, high-quality pedagogical and student success approaches, and emerging tools such as adaptive learning platforms, MOOCs, artificial intelligence, and augmented/virtual reality, amplifying campus efforts to link to and lead in local, regional, national, and global communities.

ODEE is deeply committed to diversity, equity, and inclusion. Read our statement here.
